

SPECTROSCOPIC SOLUTIONS

PRESENTS A COURSE

"PRACTICAL INTRODUCTION TO NEAR IR SPECTROSCOPY"

GIVEN BY:

Frederick H. Long, Ph.D.
President, Spectroscopic Solutions, LLC.

WHEN:

Tuesday November 15, 2005

WHERE:

Eastern Analytical Symposium
Somerset, NJ

DESCRIPTION:

Near IR Spectroscopy has become an important tool for at line and on line analysis in a variety of industries. This one day class will serve as a practical, non-mathematical, introduction to NIR spectroscopy and its applications in industry. It is aimed at chemists and engineers who need a practical understanding of NIR spectroscopy. Near IR spectroscopy is a versatile process analytical technology. Numerous example applications of NIR spectroscopy will be described including raw material identification, moisture prediction, excipient quality control, tablet content uniformity, and online process control. Relevant regulatory guidance (FDA and USP) will also be discussed.
